Bilateral Meetings

- (14.00-16.00)

Description

Sirmium fruit is a producer of fresh nectarines and fresh blueberries on over 150 ha. The season of fresh blueberries starts in the first half of June and lasts a little more than a month, while we start picking nectarines at the end of June and lasts until the first half of September. Due to a large amount of harvested fruit from our orchards, we are looking for direct and long-term cooperation with customers from the European Union. We are interested in cooperation with both open markets and retail chains. We are certified by Global G.A.P. and GRASP standards.
