Description

One of the main areas of Creatiger Llc's operation is water storage. We fabricate the world's largest waterproofing liners made in one-piece. Using these liners we make artificial ponds, reservoirs and canals watertight, protecting one of our most important treasures: water. Another important part of our work is fabricating Schilder crop covers. They preserve the valuable nutrients found in forage that is stored in bales and protect the animals from diseases caused by poor quality food.

Offer & Request

Breakthrough technology for large scale pond lining

We are fabricating the world's largest one piece pond liners up to 4000-5000 m²/panel.

This makes it possible to complete projects 5-6x times quicker, costs can be reduced and it also reduces the environmental impact of installation and manufacturing.

We are looking for installers, contractors and distributors.

Cooperation Offered

1. Outsourcing co-operation

2. Technical co-operation
3. Sales / Distribution

Cooperation Requested

1. Outsourcing co-operation
