Description

SkillDict Plc. is an eLearning specialist with outstanding expertise in the field of human resource development and training. Regardless of the sector, our clients come from almost all fields, many large Hungarian and foreign companies, national organizations and universities use our full range of training and professional services, for example: the energy sector, chemical industry, pharmaceutical industry, financial sector, agriculture, security and transport, clients from different fields of education, and also more and more micro, small and medium enterprises provide their partners and employees with learning materials and information and advertising materials, knowledge-based help desk interfaces etc. with our solution.

Our team of experts support the training development processes with more than 25 years of history in education, a training experience of tens of thousands of people, and successful implementations of hundreds of training projects.

Our main activities:

- We are developing, implementing and operating the SkillToolkit Live! Virtual Learning Environment platform.
- We are developing competence-based, activity-oriented, knowledge management based adaptive eLearning materials, creating training module systems out of them based on the SkillToolkit Live! eLearning methodology.

- If they would like, we can train our clients and professional partners for preparing them to be able to develop such high level eLearning materials by own, based on the SkillToolkit Live!
